

# Subject index to Volume 19

## A

- Adenovirus vector (replication deficient) for delivery of recombinant aequorin to organelles, 133
- Aequorin delivery to organelles using a replication deficient adenovirus vector, 133
- Age-related abnormalities in regulation of the ryanodine receptor in rat fast-twitch muscle, 15
- Agonist-evoked calcium efflux from a functionally discrete compartment in *Xenopus* oocytes, 201
- Agonist-stimulated free calcium in subcellular compartments, delivery of recombinant aequorin to organelles using a replication deficient adenovirus vector, 133
- Apoptosis or necrosis of target cells, distinct  $Ca^{2+}$  response patterns in human natural killer cells during induction of, 297
- AR4-2J cell line coexpresses dihydropyridine and  $\omega$ -conotoxin sensitive  $Ca^{2+}$  channels, 495
- Arginine vasopressin, apical and basolateral stimulation with: fluorescent analysis in polarized MDCK cell monolayers, intracellular pH and calcium interactions after, 307

## B

- Bcl-2 acts subsequent to and independent of  $Ca^{2+}$  fluxes to inhibit apoptosis in thapsigargin- and glucocorticoid-treated mouse lymphoma cells, 473
- Bombesin, generation of repetitive  $Ca^{2+}$  transients by, requires intracellular release and influx of  $Ca^{2+}$  through voltage-dependent and voltage independent channels in single HIT cells, 485
- Bombesin-stimulated HIT-T15 cells, oscillations of cytosolic free calcium in, 535
- Bradykinin,  $[Ca^{2+}]_i$  oscillations induced by, in rat glioma cells associated with  $Ca^{2+}$  store-dependent  $Ca^{2+}$  influx are controlled by cell volume and by membrane potential, 143

## C

- Calcium changes (near membrane) resulting from store release in neutrophils, detection by FFP-18, 355
- Calcium channels
  - AR4-2J cell line coexpresses dihydropyridine and  $\omega$ -conotoxin sensitive, 495
  - L-type voltage-gated, in a clonal pituitary cell line (AtT-20) of cultured mouse corticotropes, spontaneous transients of  $[Ca^{2+}]_i$  depend on external calcium and the activation of, 327
  - voltage-dependent and voltage independent, in single HIT cells, generation of repetitive  $Ca^{2+}$  transients by bombesin requires intracellular release and influx of  $Ca^{2+}$  through, 485
  - voltage-dependent, myoblast fusion requires cytosolic calcium elevation but not activation of, 365
  - voltage-independent, pharmacological and functional properties of, 269

- Calcium current, characterisation of the voltage-activated, in the marine ciliate *Euplotes vannus*, 229
- Calcium efflux (agonist-evoked) from a functionally discrete compartment in *Xenopus* oocytes, 201
- Calcium elevation (cytosolic) but not activation of voltage-dependent calcium channels required for myoblast fusion, 365
- Calcium (free), agonist-stimulated, in subcellular compartments, delivery of recombinant aequorin to organelles using a replication deficient adenovirus vector, 133
- Calcium imaging and laser scanning microscopy, 281
- Calcium imaging shows differential sensitivity to cooling and communication in luminous transgenic plants, 211
- Calcium (intracellular), focal increases in, may account for apparent low  $Ca^{2+}$  sensitivity in swine carotid artery, 501
- Calcium influx (activation of) and inhibition of agonist-induced calcium mobilization in rat glomerulosa cells, dual effects of fluoroaluminate on, 29
- Calcium mobilisation
  - inhibition of agonist-induced, in rat glomerulosa cells, dual effects of fluoroaluminate on activation of calcium influx and, 29
  - isometric tension and, in bovine tracheal smooth muscle, effects of salbutamol and histamine, 73
  - modulates growth of lens cells, 83
- Calcium oscillation(s)
  - cytosolic free, in bombesin-stimulated HIT-T15 cells, 535
  - patterns, crosstalk between cellular morphology and (insights from a stochastic computer model), 461
  - intracellular, induced by bradykinin in rat glioma cells associated with  $Ca^{2+}$  store-dependent  $Ca^{2+}$  influx are controlled by cell volume and by membrane potential, 143
  - in *Xenopus laevis* melanotrope cells, spatial and temporal aspects of, 219
- Calcium release
  - channels, biochemical and functional heterogeneity of rat cerebrum microsomal membranes in relation to SERCA  $Ca^{2+}$ -ATPases and, 375
  - effects of luminal  $Ca^{2+}$  on inositol triphosphate-induced (Correspondence and Reply), 91
  - from intracellular stores and membrane potential, interplay between (rat chromaffin cells), 113
  - from mitochondria by respiratory substrates, control of the pyridine nucleotide-linked, 521
  - InsP<sub>3</sub>-mediated, and the lysosomal compartment as intracellular calcium store in MDCK cells 157
- Calcium reserves in activated Jurkat T lymphocytes, effects of staurosporine on the capacitative regulation of the state of the, 509
- Calcium response patterns (distinct) in human natural killer cells during induction of necrosis or apoptosis of target cells, 297
- Calcium signalling in
  - chromaffin cells (rat), 113

- granule neurones studied in cerebellar slices, 59  
 nervous system, P.G. Koshyuk, A.N. Verkhatsky (Book review), 267  
 vascular smooth muscle, mechanisms for, resolved from  $^{45}\text{Ca}$  uptake and efflux experiments, 167
- Calcium stores (intracellular) in a sympathetic neuron cell line, activation of the nitric oxide/cGMP pathway is required for refilling, 399
- Calcium transients (repetitive), generation by bombesin requires intracellular release and influx of  $\text{Ca}^{2+}$  through voltage-dependent and voltage independent channels in single HIT cells, 485
- Calcium uptake (vesicular) in Dictyostelium, calmodulin-antagonists inhibit, 105
- Calcium waves (propagated intercellular) in vascular endothelial monolayers and vasodilators 97
- Calcium-activated currents in neurons, mechanism of action of the NSAID drug flufenamate, 431
- Calcium-ATPase, oxidised low density lipoprotein inhibits platelet plasma membrane, 453
- Calcium-ATPases and  $\text{Ca}^{2+}$  release channels, biochemical and functional heterogeneity of rat cerebrum microsomal membranes in relation to SERCA, 375
- Calcium-dependent  
 $\text{Ca}^{2+}$ -release mechanisms and inositol trisphosphate and, interactions between, on the endoplasmic reticulum of permeabilised bovine aortic endothelial cells, 315  
 exocytosis in pituitary melanotrophs, comparison of the photolabile calcium chelators nitrophenyl-EGTA and DM-nitrophen, 185  
 exocytosis, pancreastatin inhibits insulin secretion in RINm5F cells through obstruction of G-protein mediated, 125
- Calcium-induced calcium release (CICR) in neurones (Review), 1  
 single smooth muscle cell, high cytoplasmic  $\text{Ca}^{2+}$  levels reached during, as reported by a low affinity  $\text{Ca}^{2+}$  indicator Mag-Indo-1, 391
- Calcium-sensing receptor coupled to release of intracellular calcium stores, evidence for a, 43
- Calmodulin-antagonists inhibit vesicular  $\text{Ca}^{2+}$  uptake in Dictyostelium, 105
- cAMP elevating agents, effects of, on carbachol-induced phosphoinositide hydrolysis and calcium mobilization in cultured canine tracheal smooth muscle cells, 243
- Carbachol-induced phosphoinositide hydrolysis and calcium mobilization in cultured canine tracheal smooth muscle cells, effects of cAMP elevating agents on, 243
- Cardiac myocytes, photolysis of caged compounds characterized by ratiometric confocal microscopy, a new approach to homogeneously control and measure the calcium concentration in, 255
- Carotid artery (swine), focal increases in  $[\text{Ca}^{2+}]_i$  may account for apparent low  $\text{Ca}^{2+}$  sensitivity in, 501
- Catecholamine secretion,  $\text{Mn}^{2+}$  can substitute for  $\text{Ca}^{2+}$  in causing, in bovine adrenal chromaffin cells, 419
- Cation (divalent) channel distinguishable from endogenous receptor-activated channels, injection of rat hepatocyte poly(A)<sup>+</sup> RNA to *Xenopus laevis* oocytes leads to expression of a constitutively-active, 439
- Cell volume and membrane potential control  $[\text{Ca}^{2+}]_i$  oscillations induced by bradykinin associated with  $\text{Ca}^{2+}$  store-dependent  $\text{Ca}^{2+}$  influx, 143
- Cerebellar slices, calcium signalling in granule neurones studied in, 59
- cGMP is not required for capacitative  $\text{Ca}^{2+}$  entry in Jurkat T-lymphocytes, 351
- Chromaffin cells  
 bovine adrenal,  $\text{Mn}^{2+}$  can substitute for  $\text{Ca}^{2+}$  in causing catecholamine secretion but not for increasing tyrosine hydroxylase phosphorylation in, 419  
 rat,  $\text{Ca}^{2+}$  signalling in, 113
- Confocal microscopy (ratiometric), photolysis of caged compounds characterized by, a new approach to homogeneously control and measure the calcium concentration in cardiac myocytes, 255
- D**
- Depolarization-induced elevations of cytosolic free calcium in human neuroblastoma cells,  $\alpha$ -parvalbumin reduces, 527
- Dictyostelium, calmodulin-antagonists inhibit vesicular  $\text{Ca}^{2+}$  uptake in, 105
- Dihydropyridine and  $\omega$ -conotoxin sensitive  $\text{Ca}^{2+}$  channels, AR4-2J cell line coexpresses, 495
- DM-nitrophen and nitrophenyl-EGTA, comparison of the photolabile calcium chelators, 185
- E**
- Effects of staurosporine on the capacitative regulation of the state of the  $\text{Ca}^{2+}$  reserves in activated Jurkat T lymphocytes, 509
- Endoplasmic reticulum  
 permeabilised bovine aortic endothelial cells, interactions between inositol trisphosphate and  $\text{Ca}^{2+}$ -dependent  $\text{Ca}^{2+}$ -release mechanisms on the, 315  
 concentration of calcium ions in, 547
- Endothelium-dependent vasodilators do not cause propagated intercellular  $\text{Ca}^{2+}$  waves in vascular endothelial monolayers, 97
- Ether lipid-induced cell damage of neuroblastoma cells is only weakly correlated with increased intracellular  $\text{Ca}^{2+}$  levels, 383
- Euplotes vannus*, characterisation of the voltage-activated calcium current in, 229
- F**
- FFP-18, detection by, near membrane  $\text{Ca}^{2+}$  changes resulting from store release in neutrophils, 355
- Flufenamate (NSAID drug) on  $[\text{Ca}^{2+}]_i$  and  $\text{Ca}^{2+}$ -activated currents in neurons, mechanism of action, 431
- Fluorescent analysis in polarized MDCK cell monolayers, intracellular pH and calcium interactions after apical and basolateral stimulation with arginine vasopressin, 307
- Fluorescent ion indicators for simultaneous measurements of pH and  $\text{Ca}^{2+}$ , 337
- Fluoroaluminate on activation of calcium influx and inhibition of agonist-induced calcium mobilization in rat glomerulosa cells, dual effects of, 29
- G**
- G-protein mediated calcium-directed exocytosis, pancreastatin inhibits insulin secretion in RINm5F cells through obstruction of, 125
- Glioma cells (rat),  $[\text{Ca}^{2+}]_i$  oscillations induced by bradykinin

associated with  $\text{Ca}^{2+}$  store-dependent  $\text{Ca}^{2+}$  influx are controlled by cell volume and by membrane potential, 143  
 Glomerulosa cells (rat), dual effects of fluoroaluminate on activation of calcium influx and inhibition of agonist-induced calcium mobilization, 29  
 Growth of lens cells, calcium mobilisation modulates, 83

## H

High cytoplasmic  $\text{Ca}^{2+}$  levels reached during  $\text{Ca}^{2+}$ -induced  $\text{Ca}^{2+}$  release in single smooth muscle cell as reported by a low affinity  $\text{Ca}^{2+}$  indicator Mag-Indo-1, 391  
 Histamine and salbutamol, effects of, calcium mobilization and isometric tension in bovine tracheal smooth muscle, 73

## I

Inositol trisphosphate ( $\text{InsP}_3$ )  
 $\text{Ca}^{2+}$ -dependent  $\text{Ca}^{2+}$ -release mechanisms and, interactions between, on the endoplasmic reticulum of permeabilised bovine aortic endothelial cells, 315  
 -induced  $\text{Ca}^{2+}$  release, effects of luminal  $\text{Ca}^{2+}$  on: facts or artifacts? (Correspondence and Reply), 91  
 -mediated  $\text{Ca}^{2+}$  release, and the lysosomal compartment as intracellular calcium store in MDCK cells 157  
 Insulin secretion in RINm5F cells inhibited by pancreastatin through obstruction of G-protein mediated, calcium-directed exocytosis, 125  
 Isometric tension in bovine tracheal smooth muscle, 73

## J

Jurkat T lymphocytes  
 activated, effects of staurosporine on the capacitative regulation of the state of the  $\text{Ca}^{2+}$  reserves in, 509  
 cGMP is not required for capacitative  $\text{Ca}^{2+}$  entry in, 351

## L

Laser scanning microscopy and calcium imaging, 281  
 Lens cells, calcium mobilisation modulates growth of, 83  
 Low density lipoprotein (oxidized) inhibits platelet plasma membrane  $\text{Ca}^{2+}$ -ATPase, 453  
 L-type  $\text{Ca}^{2+}$  channel current,  $24,25(\text{OH})_2$  vitamin  $\text{D}_3$  modulates the, in UMR 106 cells, 193  
 Lysosomal compartment as intracellular calcium store in MDCK cells and  $\text{InsP}_3$ -mediated  $\text{Ca}^{2+}$  release, 157

## M

Mag-Indo-1 (a low affinity  $\text{Ca}^{2+}$  indicator) reports of high cytoplasmic  $\text{Ca}^{2+}$  levels reached during  $\text{Ca}^{2+}$ -induced  $\text{Ca}^{2+}$  release in single smooth muscle cell, 391  
 MDCK cell monolayers (polarized), fluorescent analysis in, intracellular pH and calcium interactions after apical and basolateral stimulation with arginine vasopressin, 307  
 Membrane potential and  
 $\text{Ca}^{2+}$  release from intracellular stores, interplay between (rat chromaffin cells), 113  
 cell volume control  $[\text{Ca}^{2+}]_i$  oscillations induced by bradykinin associated with  $\text{Ca}^{2+}$  store-dependent  $\text{Ca}^{2+}$  influx, 143  
 myoplasmic  $[\text{Ca}^{2+}]$  (measurement of) in developing rat myotubes at rest and in response to stimulation, 409

Microsomal membranes (rat cerebrum), biochemical and functional heterogeneity of, in relation to SERCA  $\text{Ca}^{2+}$ -ATPases and  $\text{Ca}^{2+}$  release channels, 375  
 Mitochondria, control of the pyridine nucleotide-linked  $\text{Ca}^{2+}$  release from, by respiratory substrates, 521  
 $\text{Mn}^{2+}$  can substitute for  $\text{Ca}^{2+}$  in causing catecholamine secretion but not for increasing tyrosine hydroxylase phosphorylation in bovine adrenal chromaffin cells, 419  
 Muscle (fast-twitch), age-related abnormalities in regulation of the ryanodine receptor in rat, 15  
 Myoblast fusion requires cytosolic calcium elevation but not activation of voltage-dependent calcium channels, 365  
 Myotubes (developing rat) at rest and in response to stimulation, measurement of membrane potential and myoplasmic  $[\text{Ca}^{2+}]$  in, 409

## N

Natural killer cells (human) during induction of necrosis or apoptosis of target cells, distinct  $\text{Ca}^{2+}$  response patterns in, 297  
 Neuroblastoma cells  
 ether lipid-induced cell damage of, is only weakly correlated with increased intracellular  $\text{Ca}^{2+}$  levels, 383  
 human,  $\alpha$ -parvalbumin reduces depolarization-induced elevations of cytosolic free calcium in, 527  
 Neurons  
 sympathetic, cell line, activation of the nitric oxide/cGMP pathway is required for refilling intracellular  $\text{Ca}^{2+}$  stores in, 399  
 granule, in cerebellar slices, calcium signalling in, 59  
 mechanism of action of the NSAID drug flufenamate on  $[\text{Ca}^{2+}]_i$  and  $\text{Ca}^{2+}$ -activated currents in, 431  
 Neutrophils, near membrane  $\text{Ca}^{2+}$  changes resulting from store release in (detection by FFP-18), 355  
 Nitric oxide/cGMP pathway, activation of the, is required for refilling intracellular  $\text{Ca}^{2+}$  stores in a sympathetic neuron cell line, 399  
 Nitrophenyl-EGTA and DM-nitrophen, comparison of the photolabile calcium chelators, 185  
 Non-steroidal anti-inflammatory drug flufenamate on  $[\text{Ca}^{2+}]_i$  and  $\text{Ca}^{2+}$ -activated currents in neurons, mechanism of action of the, 431

## P

Pancreastatin inhibits insulin secretion in RINm5F cells through obstruction of G-protein mediated, calcium-directed exocytosis, 125  
 Parvalbumin (alpha) reduces depolarization-induced elevations of cytosolic free calcium in human neuroblastoma cells, 527  
 Phosphoinositide-mediated phototransduction in *Drosophila* photoreceptors, the role of  $\text{Ca}^{2+}$  and trp. [R.C. Hardie, B. Minke. *Cell Calcium* 1995; 18(4): 256-274, erratum], 95  
 Photolysis of caged compounds characterized by ratiometric confocal microscopy, a new approach to homogeneously control and measure the calcium concentration in cardiac myocytes, 255  
 Photoreceptors (*Drosophila*), phosphoinositide-mediated phototransduction in [R.C. Hardie, B. Minke. *Cell Calcium* 1995; 18(4): 256-274, erratum], 95  
 Pituitary cell (clonal) line (AtT-20) of cultured mouse corticotropes, spontaneous transients of  $[\text{Ca}^{2+}]_i$  depend on

- external calcium and the activation of L-type voltage-gated calcium channels, 327
- Pituitary cells (bovine anterior), effect of extracellular polyvalent cations on, 43
- Pituitary melanotrophs, calcium-dependent exocytosis in, 185
- Plants (luminous transgenic) calcium imaging shows differential sensitivity to cooling and communication in, 211
- Platelet plasma membrane, oxidised low density lipoprotein inhibits  $\text{Ca}^{2+}$ -ATPase in, 453
- Poly(A)<sup>+</sup> RNA (rat hepatocyte), injection of, to *Xenopus laevis* oocytes leads to expression of a constitutively-active divalent cation channel distinguishable from endogenous receptor-activated channels, 439
- Polyvalent cations (extracellular) on bovine anterior pituitary cells, evidence for a  $\text{Ca}^{2+}$ -sensing receptor coupled to release of intracellular calcium stores, 43
- Protein kinase A and protein kinase C, involvement of, 24,25(OH)<sub>2</sub> vitamin D<sub>3</sub> modulates the L-type  $\text{Ca}^{2+}$  channel current in UMR 106 cells, 193
- Pyridine nucleotide-linked  $\text{Ca}^{2+}$  release from mitochondria by respiratory substrates, control of the, 521
- R**
- Receptor ( $\text{Ca}^{2+}$ -sensing) coupled to release of intracellular calcium stores, evidence for a, 43
- Ryanodine receptor in rat fast-twitch muscle, age-related abnormalities in regulation of the, 15
- S**
- Salbutamol and histamine, effects of, calcium mobilization and isometric tension in bovine tracheal smooth muscle, 73
- Smooth muscle, bovine tracheal, calcium mobilization and isometric tension in, effects of salbutamol and histamine, 73
- Smooth muscle cells (cultured canine tracheal), effects of cAMP elevating agents on carbachol-induced phosphoinositide

hydrolysis and calcium mobilization in, 243

Staurosporine, effects of, on the capacitative regulation of the state of the  $\text{Ca}^{2+}$  reserves in activated Jurkat T lymphocytes, 509

**T**

Tyrosine hydroxylase phosphorylation increase in bovine adrenal chromaffin cells,  $\text{Mn}^{2+}$  cannot substitute for  $\text{Ca}^{2+}$  to cause, 419

**V**

Vascular smooth muscle mechanisms for Ca signalling in, 167

Vasodilators, endothelium-dependent, do not cause propagated intercellular  $\text{Ca}^{2+}$  waves in vascular endothelial monolayers, 97

Vitamin D<sub>3</sub> [24,25(OH)<sub>2</sub>] modulates the L-type  $\text{Ca}^{2+}$  channel current in UMR 106 cells, involvement of protein kinase A and protein kinase C, 193

**W**

$\omega$ -conotoxin and dihydropyridine sensitive  $\text{Ca}^{2+}$  channels, AR4-2J cell line coexpresses, 495

**X**

*Xenopus laevis* melanotrope cells, spatial and temporal aspects of  $\text{Ca}^{2+}$  oscillations in, 219

*Xenopus laevis* oocytes

agonist-evoked calcium efflux from a functionally discrete compartment in, 201

injection of rat hepatocyte poly(A)<sup>+</sup> RNA to, leads to expression of a constitutively-active divalent cation channel distinguishable from endogenous receptor-activated channels, 439
